2013-2018 (5 years)

## Prometheus

My second home for 5 years. I had a key role on the design team, where I got to acquire experience working on big scale projects for clients like Disney, ESPN, Redbull and Star Sports, delivering products that include branding, graphic packages, interactive promotion campaigns that sync multiple screens and devices, developing complex dynamic graphics for live TV events, VOD platforms and more. Worked and played with some of the best professionals at a variety of fields such as: directors, animators, 3D artists, programmers, copywriters, sound engineers, all working on pushing the creative and technological boundaries to the next level.

2012-2013 (1 year)

## Adler Brands

My first “big time job” right out off college. I consider my experience there as a design boot camp, where I learned that an intensive and focused year can produce a lot of great design. I still enjoy spotting my designs from my time there sitting on the supermarket shelf.

2008-2012 (4 years)

## Shenkar College of Engineering and Design

B. Design, visual communication department.

I'd do it again.

1986-

## The Shmancy

My never ending life project. in a good way :).
